

Mitchel Athletic Complex

MUNICIPALITY: County of Nassau

LOCATION: Uniondale, New York

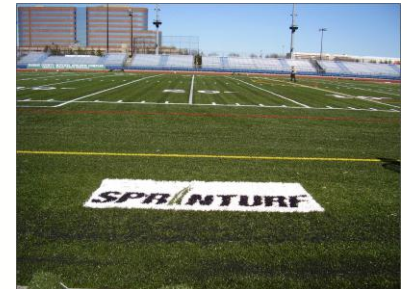

Project Description:

This project was awarded to Laser in early 2007 and consisted of the construction of a synthetic-turf field at Nassau County's premier athletic facility. Due to the early spring deadline, excavation of this field was unorthodox and innovative. The severe cold winter conditions inspired Laser to mill the frozen surface as a means of excavating down to the proposed sub-grade and keeping the project on schedule. The field was completed on time. Currently, the field is used by local universities, as well as for professional lacrosse tournaments.

Project Elements:

- Multi-purpose synthetic-turf field
- Complete under-drain storm-water collection system with positive outfall
- Created access to the field by bridging over the existing track surface without any damage

Duke University Lacrosse Coach Praises New Mitchel Athletic Complex Field

Duke University lacrosse coach John Danowski recently told Newsday that the new lacrosse field at the Mitchel Athletic Complex in Uniondale is the "best public venue around." The artificial turf field, installed in 2007, is located in Mitchel Stadium and is also designed for use by football and soccer teams. -Newsday
