

Veterans Park

MUNICIPALITY: Town of Huntington

LOCATION: Bellerose Ave, East Northport, New York

Project Description:

This project was a design-build project undertaken for the Town of Huntington. The work consisted of constructing two multi-purpose synthetic-turf fields, a natural-grass field, a state-of-the-art skate park and an ADA-compliant playground. The existing topography of the land presented a tremendous challenge in terms of locating and providing ADA-compliant access to the various project elements requested by the Town. As part of the design-build process, Laser created a tiered site, which ultimately reduced the need for expensive retaining walls. Laser teamed up with California Skate Parks and Sprinturf to build a custom, world-class skate facility with free-formed skate bowls and numerous obstacles of various skill levels.

Project Elements:

- Two synthetic multi-purpose fields with stadium bleachers and lighting
- Natural-grass area for future field development
- Perimeter and custom ornamental fencing
- Precast concrete restroom, concession and storage building
- Recharge basin for storm-water collection
- Parking lot with drainage, sidewalks, picnic area and lighting
- State-of-the-art concrete skate park with retaining walls, bowls and entrance building
- Boundless certified ADA-compliant playground with custom sand pits and safety surface
- New irrigation and landscaping
